

Week 1

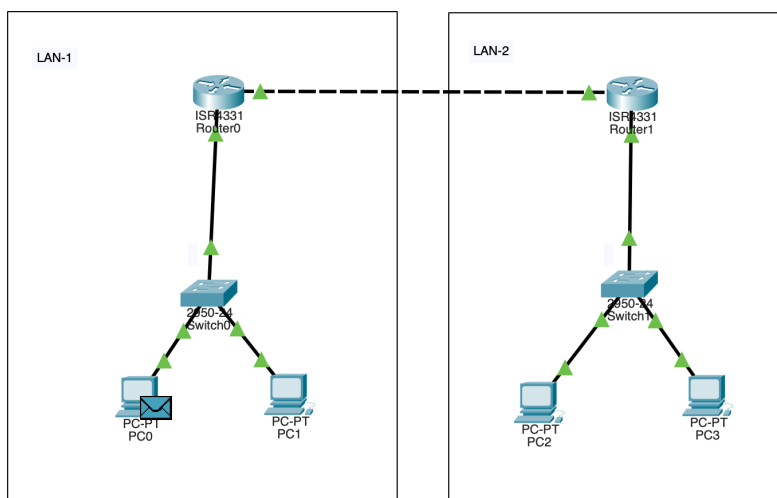

Objectives

- To understand the purpose of Cisco Packet Tracer.
- To navigate, choose network and end devices and customize them.
- Interconnect devices and configure them using a simple interface.

Installation

Objective and Solution

LAN1

PC0

- IPv4 Address: 192.168.0.1
- Subnet Mask: 255.255.255.0
- DNS Gateway: 192.168.0.3

PC1

- IPv4 Address: 192.168.0.2
- Subnet Mask: 255.255.255.0
- DNS Gateway: 192.168.0.3

Router0

- Network Address: 192.168.1.0 via 192.168.2.3
- GigabitEthernet0/0/0 IPv4: 192.168.0.3
- GigabitEthernet0/0/1 IPv4: 192.168.2.2

LAN2

PC2

- IPv4 Address: 192.168.1.1
- Subnet Mask: 255.255.255.0
- DNS Gateway: 192.168.1.3

PC3

- IPv4 Address: 192.168.1.2
- Subnet Mask: 255.255.255.0
- DNS Gateway: 192.168.1.3

Router1

- Network Address: 192.168.0.0 via 192.168.2.2
- GigabitEthernet0/0/0 IPv4: 192.168.1.3
- GigabitEthernet0/0/1 IPv4: 192.168.2.3

Drag the closed envelope to PC0 and PC2, and run the simulation!
